Canon CA–7 TEST SHEET

A test sheet is a piece of cardboard with precise markings that are designed to allow for particular things to be measured or checked.

By making a photocopy of a test sheet you can check for items such as focus, paper leading edge timing, distortion, centering, overall density and skew.

Instruction

Area No.	Description
[1]	To check leading edge non-image area
[2]	To check front/rear non-image area
[3]	To check gradation reproducibility
[4]	To check density of solid image
[5]	To check density differences of halftone between front and rear
